

Knotty Alder Cabinets

Our face frame cabinet is designed to meet industry standards.

- * 5/8" side with a fused maple melamine with a particle board core
- * All shelves are 5/8" fully adjustable and full depth of cabinet, all four edges fully banded
- * Face Frame material is 3/4" solid wood
- * Drawer boxes are 5/8" solid wood dovetail
- * Drawer fronts are solid wood with finger pull
- * Doors are a five piece with concealed hinges and finger pull
- * Hinges have a six way adjustment

Natural Knotty Alder

This is a solid five piece hardwood door with a solid raised panel. This has a clear natural finish on it and it will have a honey color, it will have contrasting light and dark pieces in the door. There will be random knots throughout the door some small and tight others big and open, no knot should be loose or falling out.

Knotty Alder with a Brown Glaze and Distress

This has all the same characters as natural knotty alder with the added brown glazing and distressing. This gives an antiqued patina look to the door and the distressing adds character to any job.

Knotty Alder with a Dark Glaze and Distress

This has all the same characters as natural knotty alder with the added dark glazing and distressing. This gives a walnut look to the door and the distressing adds character to any job.

Knotty Alder in a Shaker-style with a Mocha Glaze

This is a hardwood door of knotty alder in a classic Shaker-style door panel and drawer front, with the center panel comprised of a knotty alder veneer. It has a Mocha color finish and will have random knots throughout, most small and tight, no knot should be loose or falling out.

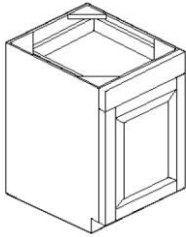

American Poplar in a Shaker-style with a White Paint Finish

This is a classic Shaker-style cabinet, in a white painted American Poplar wood. The cabinet doors and drawer fronts are a true Shaker-style, with a painted center panel of MDF. The design also incorporates relief grooves at the edges of stiles and rails for style and durability.

***** Because wood is a natural material, expect variations in the actual batch of wood used to produce your cabinetry.**
